Terminal Disclaimer

1. The terminal disclaimer filed on 12/27/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of USP 6,664,829 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney David M. Doyle (Reg. No. 43,596) on 1/12/2005.

The following changes have been made to the subject application:

Claim 24:

Lines 2-3, “,the first charging current controlled based on a first control signal” has been deleted;

Line 5, “, the first discharging current controlled based on a second control signal” has been deleted;

Lines 8-9, “, the second charging current and the second discharging current controlled based on the first and second control signals” has been deleted.

Claim 26:

Line 3, “the” has been changed to --a--;

Line 5, “the” has been changed to --a--.

Art Unit: 2816

Claim 30:

Lines 5-6, “, the first charging current controlled based on a first control signal” has been deleted;

Line 8, “, the first discharging current controlled based on a second control signal” has been deleted;

Lines 11-12, “, the second charging current and the second discharging current controlled based on the first and second control signals” has been deleted.

Claim 32:

Line 4, “the” has been changed to --a--;

Line 6, “the” has been changed to --a--.

Claim 36:

Line 1, “30” has been changed to --32--.

The Examiner’s amendment has been made in order to comply with the 35USC 112, second paragraph and to place the application in a condition for allowance.

Allowable Subject Matter

3. The following is an examiner’s statement of reasons for allowance: the amendment filed 12/27/2004 and the terminal disclaimer has overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest a circuit capable of detecting a voltage difference between a voltage on the loop filter and a voltage on the integrator capacitor, the circuit further capable of controlling the first and third current sources to at least partially reduce the voltage difference as called for in claims 24, 30 and 38. Therefore, claims 24-43 are presently allowed.
